Specific Directions for the PhxMQG Lotto Block

The background fabric should be low volume

The heart can be any "high volume" combination of fabrics, consider using your scraps

Variations to consider: (If you are feeling rebellious)

- Reverse the coloring: low volume heart and "high volume" background
- Create a pieced background
- Use curved piecing to create the original strata
- Make a mirror image such that the small piece of heart is on the left side not right
- Embellish your heart
- Change the size of your heart but please try to make it a multiple of the original finished size, such as finish at $3\frac{9}{16}"$ or $14\frac{1}{4}"$
- What can you think up?
